

In Summer 1 our learning curriculum in Reception has focused on the big question:

How does your garden grow?

WOW A giant beanstalk has appeared in the classroom!
Where has it come from?

This has been divided into these weekly sessions:

The children will be growing a variety of plants, learning about how plants grow, their parts and how to care for them. They will also learn about habitats for a range of UK wildlife and how to promote biodiversity in our school grounds and home gardens.

Week 1 Where does the beanstalk go?

Week 2 How do I grow a beanstalk?

Week 3 Can I eat what I grow?

Week 4 What's a butterfly's favourite flower?

Week 5 What creeps and crawls in our flower beds?

Week 6 What flaps and flies in our garden?

Here are some of the texts we will be using to prompt learning.
