

We want to continue to help you catch up with any learning that you may have missed due to COVID-19 lockdown so that you can achieve your very best.

We want to help you show our 'STAR' qualities at all times and to be able to use the restorative approach if we need to repair relationships.

We want to help teachers to understand how you learn and remember things more easily.

What are we doing to improve our school this year?

2021—2022

We want to help prepare you for the world outside of our school community by inviting more visitors into school and through a range of different experiences.

We want to help look after your social, emotional and mental health so that you are happy and ready to learn.

We want to develop ways for your teachers to find out how well you are doing in your creative curriculum subjects.
